EDUCATION

Bachelor of Software Engineering | 2021-2026
Gaza - Palestine
- Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Mobile App Development, Databases, Operating Systems
- GPA: 3.8

"MY PROJECTS

E -Commerce

Developed a minimal e-commerce app using Flutter that features product listing, cart management, and order summary. Implemented state management with Bloc, integrated Firebase for authentication and real-time database, and designed a clean, responsive UI optimized for both Android and iOS

ChatU – Real-time Chat App

Built a real-time messaging app using Flutter and Firebase (Auth + Firestore). Implemented user authentication, 1-to-1 messaging, and instant updates via Firestore streams. Designed intuitive UI with clean message bubbles, timestamps, and typing indicators. Used Bloc for state management and followed scalable architecture patterns.

Quizie

Developed a category-based quiz app using Flutter and Supabase, focused on programming languages like HTML, CSS, JavaScript, and Python. Implemented dynamic question fetching, Bloc state management, and shared preferences to store progress. Included features such as per-question timers, score tracking, circular progress indicators, and a results page to enhance user engagement.

SKILLS

- Dart • Flutter • Bloc • Firebase • Supabase • REST APIs • Git/GitHub • SharedPreferences • Responsive UI Design • Firebase Auth • JSON Parsing
